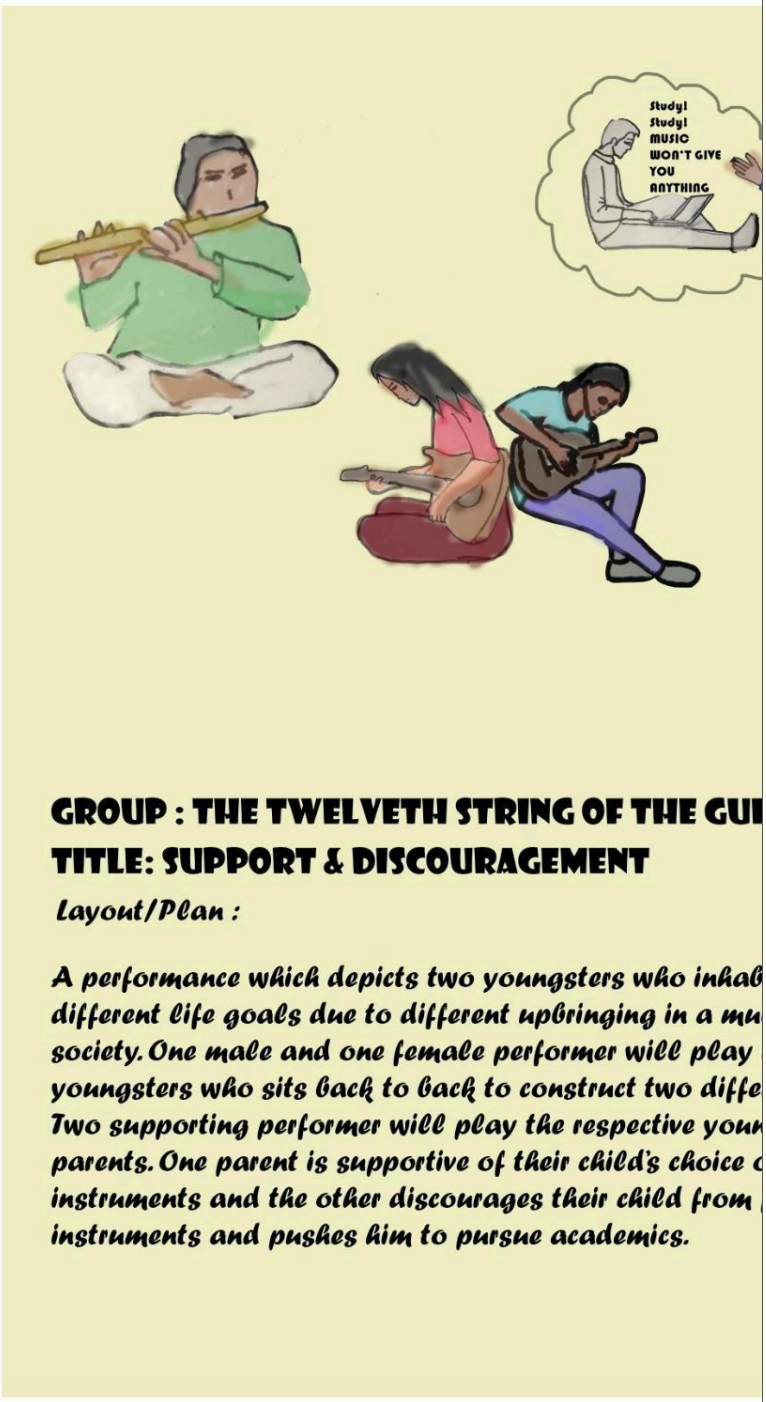
Theme			

CI theme: (Write about the semester theme 'Multiculturalism' in your language.) (50-150 words)	Multiculturalism is what is happening in which every one of the different social or racial gatherings in a general public have equivalent privileges and open doors, and none is overlooked or viewed as irrelevant. Multiculturalism is the practice of giving equal attention to people from various backgrounds in a given setting. An honors classroom with students from various places, cultures, religions, and families. And for that, their beliefs and behavior are an example of multiculturalism. at least from this course, I have felt, lived and applied, and learned multiculturalism, and it also changs some points of view to see anything.	01
Group/Individual theme: (What was your theme? Why did you take this theme?) (150-250 words)	Our theme was to provide a message about Support and Discouragement through multiculturalism performance. I took the theme because I have personally faced those thinks and for the course, I get an opportunity To let the massage to give everyone . as I am a part of media I know thinking about art as a profession everyone disagrees. But if I compare it to other communities where they support and help their children with art and passion. As we know art has no boundaries and borders but there are lots of cultures surrounding us some cultures inspired the art and some cultures discourage art . from this performance we tried to send the message that in our society to society its matters a lot, as we lived in a freedom country we can't change everyone's mind but at least we can at least try to express our thoughts and idea. For this reason, I choose the theme .and we are seeing those things surrounding us but we never try to break or express our feelings. on the behalf Of all the people like me, I am just trying to express myself and want to express their side like a mirror.	02
Artwork		

Layout & Plan:
(Attach the image of your layout)
(Why and what kind of installation/performance/others did you want to do?)
(150-250 words)



Basically we want to give a message about support and discouragement though multicultural. we made lots of plans and but in the end, we found a way to express our message properly. performance about two young people who have very different life goals as a result of their upbringing in a multicultural society. One male and one

	female performer will play the children who sit back to back to build two different worlds, and two supporting performers will play the respective children's parents. One parent encourages their child's choice of instruments, while the other discourages and pushes them. Aim for academies. and it will be a clear message for everyone that there is no wall seeing but there is 2 different story that represents the support and discouragement.	
Production: (Please write about the production process of your work from the beginning including materials you used, the place you worked at, any obstacles you faced, any improvisation you did, the result came out at the end?) (Please attach some images of your production process.) (300-400 words)	First of all that was challenging for all of our members. we took 2-3 days and in those days we make more than 20+ stories and ideas .but we were not self-satisfied. Then finally we got an idea that will tell the story of support and discouragement. all of my group members were a little bit wary about the performance but they give their best because that was the first time that kind of performance we will do in front of everyone. my group members all them was expert in something that will help to make our plan to performance. 1st we make a layout plan that will help us to stay with our idea. then we make a list of what we need to properly represent our idea. then we again change our plan and want to send a hidden message that idea is the main key source of art. so we make a list again to make a 0tk budget production. To make the idea we have to borrow lots of staff from each other to prove that if we have an idea then it is always not necessary to have a lot of budgets. if we have a will to do then we can do it, that was not mandatory but we challenge ourselves. That we will make the project properly with our own equipment and ability. then we selected the location and we practice a few times. Personally, I have found if we think about one thing more than hours to hours the plan gets better. then we choose a dress that will automatically represent our main concept. our target was to send our message properly. We started regular contact with each other. and maintaining and trying more ideas. on performance day we all reached together at 11.30 am where our performance was at 1.20 pm. we all were quite nervous so we all doubled checking our parts of the performance and our equipment and the weather also because of our location was at the **'University of liberal arts of Bangladesh'** main campus entrance of building '**D'**. we don't face any problems. we get inspired by the time in practice. students took photos, and want to know about the	04

performance. then hour performance started and everyone was trying their best for the performance. and our expectation was good we learn lots of things and experience.

Exhibition

Exhibition: (Where was the show, how was that platform, who were the spectators, was any other platform (like Shilpakala Academy/online show) better for the show, and why?) (150 -250 words) (Please attach some images/screenshots of your final work and show)	The performance was held at the “University of liberal arts of Bangladesh” main campus entrance of building D .our teachers and student of Ulab was the main spectators and the platform was good because this is our 1st time doing that kind of performance. If we can use other platforms for the performance then we will get more experience and reviews that can be helpful for our future performance or any other task. self believe is the main key of any kind of work .everyone is unique and they are best in something that kind of project help us to find our passion and also give a platform to revile it. we are here to explore our internal talent and Ulab is giving us the platform to practice it and expert about it. We need more practice and review our work to improve ourselves. so that other platforms can be very helpful for our future projects or art works. it inspires the students and helps to improve their artwork.	02

Realization	07

(Have you got all the feedback from the audience as you expected to? Did the viewers get your message? Please explain the reasons why or why did not they get your message. What have you realized about your succession at the end? How should you do the installation/performance if you want to do it again? What were the strengths of your work? Why? What were your faults? How can you avoid your faults next time? What is your thought about this project?) (400-500 words)	Yes, we got feedback from the audience. there were different types of students and everyone could relate their story to our performance .it was not so common in our country maximum story of families like that, but to talk and give a performance about it is uncommon. I still remember a student who came to us and said guys you are telling my story I want to become a cricketer but due to family pressure, I am dining BBA, as like him thots of people tell their stories after seeing the performance. for that reason and real experience, I can say yes they get the message. they get our message because it's the story of every youngster in this country. we found some mistakes in our plan for the performance it's our 1st art performance. And working as a group on an art platform communication is too much important sometimes we failed to properly communicate with each other. we can know and comfort to work in group project .day by day our experience and effort giving us good feedback. I want to change some plans and we also listed our mistake and noted if we add other kinds of staff then the performance can be more beautiful. and if I work on those kinds of artwork or performances then again then I will try to learn from those mistakes and make better in upcoming projects .our main strength was our group members' equal participation and effort. I will say there was lots of artwork and performances held on that day and they were better than us but we are not upset we learn from those mistakes we took lots of information and saw how they provide their message to the audience. we successfully complete the performance and sent our message to the audience and it was possible only for our group members effort and participation. as I mention we have learned and noted our mistakes and we are working to improve ourselves through the performance is done but we still trying to improve ourselves. If we think in a professional way then there were lots of mistakes in our performance but we are not upset because we can successfully provide our message without any communication noise and we also maintain the requirements.
